

Welcome to use the ANGELS MASCON APP!

To install and use the APP in MATLAB, follow these steps:

1. Open MATLAB: Launch the MATLAB software.

2. Access the MATLAB App Installation Interface:

 In the MATLAB toolbar at the top, click on the "APP" tab.

 From the dropdown menu, click on "Install App".

3. Select and Install the App:

 In the path that opens, you can search for the required ".mlappinstall" package, and click on it.

 On the app's detail page, click the "Install" button to begin the installation process.

 Follow the prompts to complete the installation. You may need to log in to your MathWorks account during this process.

4. Launch the Installed App:

 After installation, go back to the "APP" tab in MATLAB.

 Find the newly installed app in the list of available apps and click on it to launch.

Note: If you encounter any issues, refer to the MATLAB official documentation or help center for more detailed installation and usage guides.
